

## Data and Policy Analyst

Starting asap.

Location: Brussels, Paris or home-based

Full-time or part-time

Do you love finding stories in data and want to apply your skills to do something meaningful about climate change?

Over the last 10 years [Sandbag](#) has been compiling and using unique data sets to pour light over one of the largest climate policies in the world: the European Emissions Trading Scheme (EU ETS). We've won significant changes in policy as a result, including taking out excess permissions to pollute and clamping down on the over use of international offsets. Now, as carbon pricing starts to hit levels that make a difference and there is talk of extending the cap to cover other sectors we are looking for a new analyst to help us increase Europe's efforts to decarbonise fully using strong price signals that drive private sector decision making.

### **The Role**

You'll be working with Sandbag's team and be responsible for our data analysis - helping us unveil evidence that will win further improvements to the most impactful climate policies in Europe.

We use large publicly available data sets and curate and add to them to present previously unnoticed facts and informed forecasts about what is working and what is not.

You'll be working closely with our campaigners to get our arguments in front of decision makers and stakeholders, so we win more campaigns.

### **Core tasks**

- Develop a detailed understanding of the EU ETS
- Maintain and improve our databases and modeling tools
- Create and run scenarios relevant to the policy agenda
- Contribute to related press releases, briefings and reports

### **Must Haves**

- Demonstrated interest in and commitment to fighting climate change
- Perfect knowledge of MS Excel, R, databases, data visualization tools
- Analysis skills: ability to use evidence in a structured way
- Demonstrated (English) writing skills with ability to communicate complex concepts simply
- Delivery-focused self-starter, yet able to collaborate effectively.

### **Helpful To Haves**

- Knowledge of the EU ETS
- A degree in economics
- European foreign languages

### **To apply:**

Please submit a covering letter and CV to [contact@sandbag.be](mailto:contact@sandbag.be) asap.
